Select screen objects to view/edit parameters, run diagnostic tests, load vehicles, and select formulas.

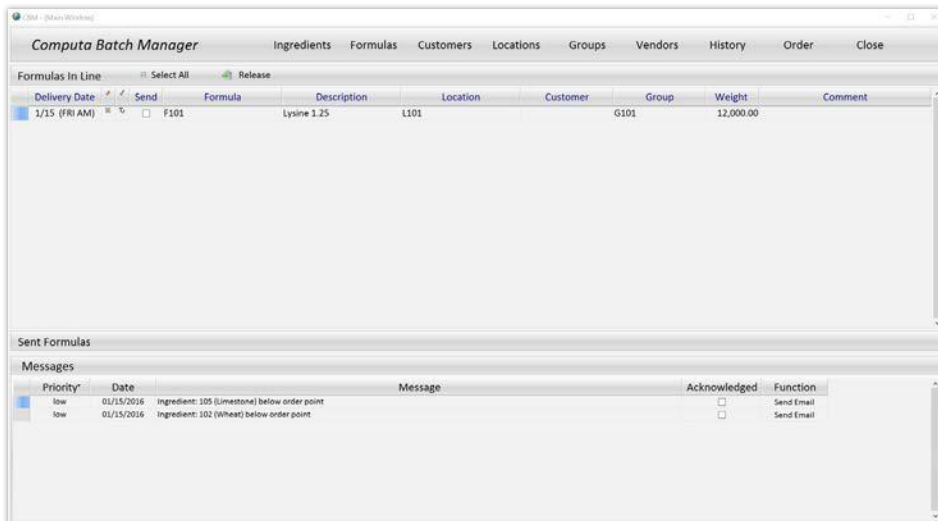

SI-2100 BATCH CONTROLLER

Quickly view inventory levels and edit ingredient parameters.

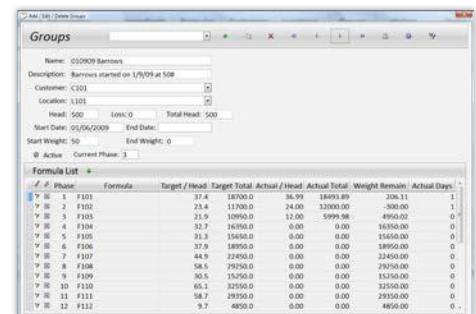

Automate an entire feed processing system all the way from grinding, to mixing, and inclusion of micro ingredients, all with a control panel.

Sudenga batching software runs directly from a desktop PC running the latest Microsoft operating system.

Compu-Batch Manager Screen

- Create and send feed orders to batching controller.
- Generate reports (history, parameters, etc.).
- Download data to 3rd party accounting software.
- Lists formulas for release to batching controller.
- Displays ingredient and error messages.
- Ingredient inventory, grain bank and lot tracking.

Group Maintenance Screen

- Enter group parameters.
- Select location and customer for feed tracking.
- Create phase list.
- Batch by group.

Group History Screen

- Tailor reports to specific parameters being monitored.
